

The **SPEED** of real-time availability, the **POWER** of information and the **PROFIT** from better business decisions – Compact Solutions delivers high performance information integration solutions for your industry, your enterprise and your business processes.

We provide high-performance Enterprise Information Integration (EII) solutions designed to solve the toughest data problems confronting financial services, manufacturing, retail and telecommunications industries worldwide.

We solve the problem of data fragmentation across disparate systems, helping corporations gain greater business value from all their information assets. Data integration is critical to solving complex enterprise-wide problems. We support a broad range of enterprise-wide data integration and data quality initiatives, including data migration/consolidation, data synchronization, master data management and cross-enterprise information integration.

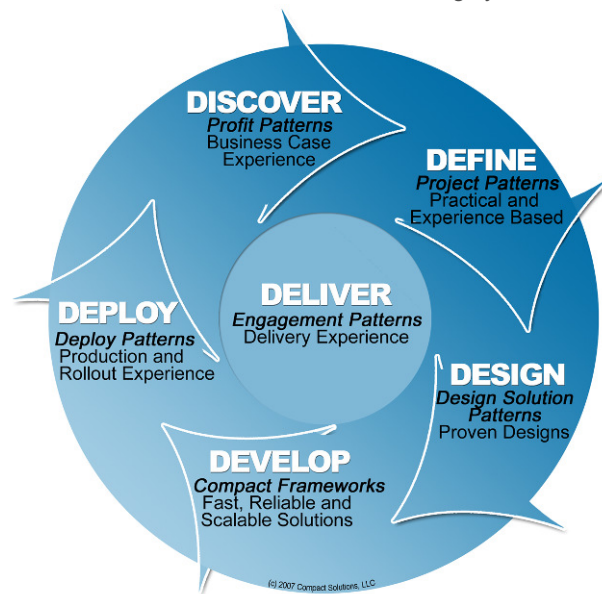

Our skill in every aspect of data warehouse infrastructure is second to none. These skills include data architecture, data warehouse assessments, data warehouse design, ETL design and development, metadata repositories, data warehouse performance optimization, and platform migration. We also help clients maintain and enhance their existing data warehouse solutions.

## EMPOWERING YOU TO BE SUCCESSFUL

Knowledge transfer is part of every project we undertake. This collaborative project approach is instrumental to the long-term success of your solutions. We build knowledge transfer directly into the overall project plan and make sure that when we leave the project, you feel fully empowered to maintain and extend your solution. Compact Solutions' Data Management Center of Excellence serves as your resource beyond any individual solution.

## COMPACT DELIVERY MODEL | LOW RISK – FIELD PROVEN

Compact's 6D Methodology covers your solution building lifecycle: *Discovery*, *Definition*, *Design*, *Development*, *Deployment* and *Delivery*. These basic steps net a systematic approach to your solutions and rapid time-to-value. The 6D Methodology has evolved to become one of the most highly efficient and cost-effective in the industry.

Based on many years of experience, we have developed a proven approach using *Compact Patterns™* that rely on industry-specific best practices in business, project, technical and rollout experience from dozens of engagements. All designed to reduce redundant work components and ensure sound design practices. Compact Patterns cover the entire project lifecycle.

COMPACT SOLUTIONS  
High Performance Information Solutions

## Why Compact Solutions?

- Real-time access to critical data
- World-class technology
- Superior Speed to Value: rapid solution development & deployment
- Field proven method -- down to a science
- Exceptional skills
- Knowledge transfer
- Offshore development options

## Solution Technology

- High-throughput transaction processing framework using parallel processing
- Real-time processing framework for Enterprise Information Integration (EII)
- Cost & processing efficient data storage solutions
- Integrating compressed & indexed flat files with data warehouses

## Compact Services

Complete Enterprise Information Integration (EII)

- Diagnostics
- Solution Development (off-shore or on-shore)
- Data Architecture
- Master Data Management
- Data Quality
- Real Time EII
- Systems Architecture
- Data Warehouse Assessment
- Data Warehouse Design
- ETL Design & Development
- Metadata Management & Repositories
- Data Warehouse Performance Optimization
- Platform Migration

## Unique EII Expertise

- Design & Development
- Metadata Systems
- Application Migration between ETL Platforms
- Continuous Flow Processing
- Metadata Driven ETL
- Performance Optimization
- Data Profiling and Data Quality
- Center of Excellence (COE) Development
- Project and Staff Mentoring
